

8cm Mini DVD Product Offering

Capture every moment with Verbatim Mini DVDs! Capacity, personalization or nostalgia, Verbatim offers the most extensive range of mini DVD media for your personal camcorder. For those using a Dual Layer camcorder, Verbatim is proud to offer Mini Dual Layer DVD, for up to 2.66 of storage capacity, allowing you to record nearly one hour of continuous recording.

Looking for that “personal” touch, our standard Mini DVD has a white inkjet printable surface. This surface is ideal for custom printing using a direct printing inkjet printer, adhering labels or simply using a felt tip marker. If that’s not enough, the Verbatim DigitalMovie™ disc has a unique movie reel surface and nostalgic charm.

All Verbatim Mini DVDs include a VideoGard™ Hard Coat Protection. This added layer protects the disc from everyday handling, making it 40 times more scratch resistant than a standard DVD!
